The 4-H Filmmaking Studio & Workshop

The 4-H Filmmaking Studio and Workshop, located at www.4-H.org/curriculum/filmmaking, is the online space to find tools and resources about video production. On the home page of the web site, you'll find the Filmmaking Workshop videos—an 11 module "virtual workshop", geared toward youth interested in making Science, Engineering, and Technology (SET) films. Although the workshop discusses SET as a primary content area, the learning modes and principles apply across 4-H's mission mandates—SET, Healthy Living, and Citizenship.

Featured Films
View some professionally developed featured science films on topics such as wind power, water quality, adaptations, soil, and biotechnology. You can also view user-generated films by 4-H'ers.

Clips & Tips
Test your knowledge and what you've learned from the 4-H Filmmaking Workshop videos. On this sub-page you'll find 3 science documentary clips with expert tips about the techniques that were used to produce the films. You'll also find some short video clips under 'Test Yourself'. See what you think about the techniques that were used (narration, composition, varied screen shots, etc.) and then click to view what the professionals thought about them.

Online Editor
Details on web-based video editing tools and an upload/share feature will be available in the future.

Resources
Downloadable PDFs and resources on choosing your camera, converting footage, uploading Your video, troubleshooting, and much more. Also learn about creative commons, sound effects, and where to find additional media for your films.

Give Feedback
We encourage you to take a short 3 question survey and assessment of the 4-H Filmmaking Studio and Workshop. Your feedback will be used to inform future projects.

Get the DVD
DVDs will be available for those who do not have access to high speed internet in their programming environments. DVDs cost $11.95 and include all 11 workshop video modules.
